Electrosurgical (ESU) Pencil

ClearSlit is an electrosurgical device for conducting enhanced electro surgery procedures. This device is designed as pencil for easy and efficient usage. The cable (3m) is made of PVC in blue color with white pencil. The tip is made of stainless steel (4cm x 2.3mm). The maximum current output is 1A with 0-1.0MHZ frequency.

Features

- Light weight.
- Streamlined.
- Anti-slippery surface.
- PVC medical cable - 3m
- Stainless Steel tip - 4 cm
- Diameter of the tip - 2.3mm
- Appropriate switch sensitivity

- Maximal output current: - 1A
- Frequency confine: 0-1.0MHZ
- Current resistance: 200 (Ohms)
- 170mm-ABS pencil appearance
- Ways of aseptic technique: Sterile EO
- Clear & appropriate switch position, with gentle "click"

**HIGH QUALITY
MEDICAL DEVICES**

Newtech Medical Devices Pvt. Ltd.

We develop, manufacture, market and support cutting edge vascular access devices and accessories to meet the clinical needs of the medical industry, particularly in the field of interventional cardiology and dialysis. Our company's engineering and applications expertise provides superior products whose progressive designs accommodate advances in medical device and whose quality anticipates the requirements of our professional clients and the patients they serve.

Currently one of the largest manufacturer, exporter & importer in the field of Cardiology, Nephrology, Urology & Surgical Disposables in INDIA.

ESU Pencil Holster - Introduction

Newtech's ESU pencil holster provides the surgeon with a safer and time-saving option. The patented cleaning edge design inside the holster allows surgeons to wipe off carbonized tissue sticking on the tip electrode, reducing surgical time.

According to U.S. AORN and ECRI's recommended practices for electrosurgery, a well-insulated safety holster shall be used to store the active electrode, preventing surgical fire or electrosurgical burn. Always place unused ESU active tip electrodes in a safety holster.

Specification:

Usage: Electrosurgical safety holster is used for placement of pencils when not in use

Advantage: With large clip for easy attachment to drape or stand

Size: 50×25×190mm

Arterial Catheter

Arterial Catheter is indicated for:

- Arterial catheterization
- Deep vein catheterization
- Peripheral venous catheterization (midline)

Newtech Medical Devices Pvt. Ltd.

We develop, manufacture, market and support cutting edge vascular access devices and accessories to meet the clinical needs of the medical industry, particularly in the field of interventional cardiology and dialysis. Our company's engineering and applications expertise provides superior products whose progressive designs accommodate advances in medical device and whose quality anticipates the requirements of our professional clients and the patients they serve.

Currently one of the largest manufacturer, exporter & importer in the field of Cardiology, Nephrology, Urology & Surgical Disposables in INDIA.

Arterial Catheter - Introduction

Arterial Catheter is a catheter for arterial access inserted by the Seldinger technique. Although it can be inserted in a variety of arteries, the most common sites for the placement of this catheter are the radial and the femoral artery.

The Seldinger technique makes arterial puncture easier particularly in hypotensive patients with a weak peripheral pulse and when arteries are atherosclerosed or narrow.

The product is supplied in a kit containing:

- 1 introducer needle
- 1 straight guidewire
- 1 transparent and radiopaque catheter in polyethylene with winged hub (hub without wings).

This catheter is suitable for a variety of arterial and venous applications in both adults and children depending upon the length and the size of the catheter.

Central Venous Catheter & Kit

Carefully & geometrically designed soft and conical tip of Catheter ensures safe and easy insertion offering good tissue and blood tolerance thus reducing the risk of blood clotting & intra vascular pain. Exceptionally biocompatible PU material which by property is stiff & non-kinking at room temperature but softens at body temperature thus ensures correct placement of catheter. Soft & flexible tip of Guidewire with excellent stiffness offers good Torque which helps in easy insertion and prevents vessel perforation. Clear and transparent radio-opaque material of lumen with definite marking and color coding ensures accurate positioning and minimum vessel damage.

Product Feature:

Soft Tip

Newtech ClearCVC catheter has been able to Reduce trauma to vessel wall upon introduction and in-situ. The radiopaque catheter and tip facilitates vessel location when visualized by X-Ray.

Soft Hub

ClearCVC comes with softer hub for better placement of catheter without any pain.

Antimicrobial Heparin Cap

Specially made adaptor helps to avoid infection.

Biocompatible Polyurethane Material

With new generation Biocompatible polyurethane material which is tested for toxicity and hemocompatibility and this become softer in body.

Multi-Lumen Available

Newtech's Central venous catheter is available in single, double, triple lumen for infants and adults.

Newtech Medical Devices

We develop, manufacture, market and support cutting edge vascular access devices and accessories to meet the clinical needs of the medical industry, particularly in the field of interventional cardiology and dialysis. Our company's engineering and applications expertise provides superior products whose progressive designs accommodate advances in medical device and whose quality anticipates the requirements of our professional clients and the patients they serve.

Currently one of the largest manufacturer & importer in the field of Cardiology, Nephrology & Surgical Disposables in INDIA.

HSG Catheter - Introduction

The ideal choice of catheter for diagnostic procedures, such as radiological hysterosalpingography or hydro hysterosonography. Newtech Medical Devices HSG Catheters are used to access the uterine cavity for saline infusion sonohysterography or for injection of contrast medium into the uterine cavity and fallopian tubes for evaluation of tubal patency.

Process of Hysterosalpingography (HSG):

Hysterosalpingography (HSG), also known as uterosalpingography, is a radiologic procedure to investigate the shape of the uterine cavity and the shape and patency of the fallopian tubes. This means it is a special x-ray using dye to look at the womb (uterus) and Fallopian tubes. It injects a radio-opaque material into the cervical canal and usually fluoroscopy with image intensification. A normal result shows the filling of the uterine cavity and the bilateral filling of the fallopian tube with the injection material. To demonstrate tubal rupture, spillage of the material into the peritoneal cavity needs to be observed. It has vital role in treatment of infertility especially in case of fallopian tube blockage.

Features & Advantages:

- Smooth tip reduces risk of trauma upon insertion and removal of catheter.
- Stable placement sheath decreases the need for a tenaculum.
- Soft, concentric balloon secures above the internal os preventing leakage of sterile saline or water-based contrast media.
- Made with 20% Radiopaque material allowing catheter to be seen under x-ray.
- Fixed volume syringe prevents over-inflation of the balloon.

Newtech Medical Devices

We develop, manufacture, market and support cutting edge vascular access devices and accessories to meet the clinical needs of the medical industry, particularly in the field of interventional cardiology and dialysis. Our company's engineering and applications expertise provides superior products whose progressive designs accommodate advances in medical device and whose quality anticipates the requirements of our professional clients and the patients they serve.

Currently one of the largest manufacturer, exporter & importer in the field of Cardiology, Nephrology, Urology & Surgical Disposables in INDIA.

PCN Catheter - Introduction

Urology's PCN Catheter is used for temporary or permanent drainage & Irrigation of urine from the kidney by direct Puncture in the presence of distal obstruction.

The catheter provides temporary drainage of urine from the kidney, and it is also known as Mono J Stent, Pigtail Nephrostomy catheter or pigtail drainage catheter.

Features & Advantages:

- Used for the temporary or permanent drainage.
- Avoids having to insert a needle and catheter separately i.e. one after the other.
- Highly radiopaque for better visualization.
- Soft and flexible material for patient’s comfort.
- Durable with superior bio-compatibility.

Our PCN Catheters are made as per international standards to provide you with premium quality. In addition, we have a qualified R&D team to ensure the products are consistently being made with utmost precision to provide you with the safest solutions.

The PCN Catheter with Trocar is made of high quality medical grade polyurethane. Both are supplied in a sterile peel-open package and are intended for one-time use only.
